

# EduCare WordPress Theme

---

 [docs.crazycafe.net/print/educare-wordpress-theme](https://docs.crazycafe.net/print/educare-wordpress-theme)

## Introduction

Thank you for purchasing our WordPress Theme. If you have any questions that are beyond the scope of this documentation, please feel free to email us via our contact form on our profile page <http://themeforest.net/user/champtheme> or via email [hello.champtheme@gmail.com](mailto:hello.champtheme@gmail.com).

Please read this documentation, chapter after chapter so that your customization work will be fast and easy.

Thank you so much

## Installing theme

Please read this chapter step by step and you will see how easy is to install and import this wordpress theme. Also we attached some video.

### Option 1

1. Unzip downloaded package with software Winzip or some of your choice
2. Then you will see folder called “educare-package” and inside this folder you will see folder called “**educare-champtheme**”
3. By using some software FTP client (Filezilla) upload this folder “**educare-champtheme**” to your WordPress installation. In path **wp-content/themes/**.
4. Go to your Admin (area where did you install core wordpress), Appearance, Themes and you will see **Educare Champtheme** theme. Activate it.

### Option 2

1. Unzip downloaded package with software Winzip or some of your choice
2. Then you will see folder called “factory-package” and inside this folder you will see .zip file called “**educare-champtheme.zip**”
3. Go to your Admin (area where did you install core wordpress), Appearance, Themes and click Add New. Then click Upload. Then you will see button Choose, click it and choose zip archive **educare-champtheme.zip**. Then click on button Install Now.
4. Activate it.

## Installing required plugins

After installing theme, you need to install required plugins. We have added some awesome plugins support in **Light** so you can create page layout, control theme settings, one click demo importer & others.

After install theme, you will see a notice for install required theme install.

## Plugins

[Add New](#)

This theme requires the following plugins: *Educare Toolkit* and *WPBakery Visual Composer*.

This theme recommends the following plugins: [Contact Form 7](#) and [One Click Demo Import](#).

[Begin installing plugins](#) | [Dismiss this notice](#)

Click on **Begin installing plugins**. Or go **Appearance > Install** Plugins. You will see list of plugin need to be installed. Now, check **all plugins** & select bulk options **install**.

## Install Required Plugins

The installation process is starting. This process may take a while on some hosts, so please be patient.

### Installing Plugin Educare Toolkit (1/4)

Educare Toolkit installed successfully. [Show Details.](#)

### Installing Plugin WPBakery Visual Composer (2/4)

WPBakery Visual Composer installed successfully. [Show Details.](#)

### Installing Plugin Contact Form 7 (3/4)

Contact Form 7 installed successfully. [Show Details.](#)

### Installing Plugin One Click Demo Import (4/4)

One Click Demo Import installed successfully. [Show Details.](#)

All installations have been completed.

[Return to Required Plugins Installer](#)

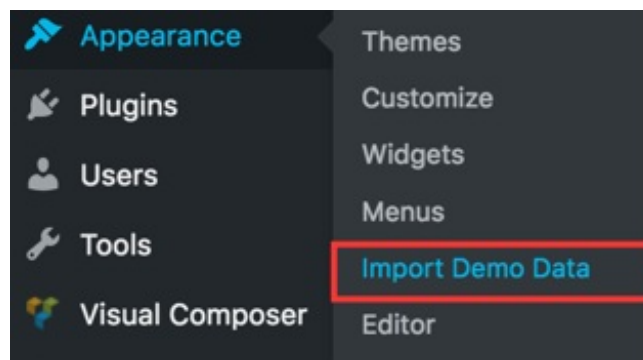

After install, we needed to active plugins. Go Activate & again select all plugins & active.

## Import demo data

If you would like to install demo data you can easily do this.

Note: Demo data is only for testing theme, learn how theme will work etc. Do not install demo data on a production website.

For install demo data go on Appearance > Import demo data.

You will see demo data import screen.

# One Click Demo Import

Before you begin, make sure all the required plugins are activated. ✕

Importing demo data (post, pages, images, theme settings, ...) is the easiest way to setup your theme. It will allow you to quickly edit everything instead of creating content from scratch.

When you import the data, the following things might happen:

- No existing posts, pages, categories, images, custom post types or any other data will be deleted or modified.
- Posts, pages, images, widgets and menus will get imported.
- Please click "Import Demo Data" button only once and wait, it can take a couple of minutes.

After import demo, just set static homepage from settings > reading. You'll be done! :-)

Import Demo Data

Click on import demo data & please wait for import all data. After importing, you need to three things:

1. **Settings** > *Reading & set homepage as a static page & select homepage version* .
2. **Appearance** > *Menu & set website menu as primary* .

Now visit site. You will see a fully function site.

## Theme options

Using theme options, you can control every setting on theme. We made theme options for beginner so you can control easily. Lets start learning

### 1 . Header area

H Header area

Logo and favicon

You can change header top area phone number, Email or customize this

## 2. Logo and favicon

The screenshot shows the 'Educare theme options' interface by CrazyCafe. At the top right, there are buttons for 'Save', 'Restore', and 'Reset All Options', along with a 'show all options' link. The left sidebar contains navigation items: 'Header area', 'Logo and favicon' (selected), 'Typography', 'Styling', 'Blog Settings', 'Footer Settings', and 'Backups'. The main content area is divided into three sections:

- Favicon:** Includes an 'Add Image' button and the instruction: 'Upload favicon image. Favicon image should be square sized image.'
- Enable text logo?:** A toggle switch is currently set to 'OFF'. The instruction reads: 'If you want to enable text logo, select on.'
- Logo:** Includes an 'Add Image' button and the instruction: 'Upload site logo.'
- White color logo:** Includes an 'Add Image' button and the instruction: 'White color logo will show on footer widgets by using shortcode.'

At the bottom of the page, it says 'Powered by Codestar Framework.' and 'Version 1.0.1'.

You can change site's logo & favicon here. You can use text as logo too.

## 3. Typography

The screenshot shows the 'Educare theme options' interface by CrazyCafe, focusing on the 'Typography' section. The top navigation and buttons are the same as in the previous screenshot. The left sidebar has 'Typography' selected. The main content area includes the following settings:

- Body font:** Two dropdown menus are set to 'Roboto' and '300'. The instruction is: 'Select body google font & font weight.'
- Body font size:** A text input field is set to '16px'. The instruction is: 'Select body font size.'
- Body font line height:** A text input field is set to '27px'. The instruction is: 'Select body font line height.'
- Heading font:** Two dropdown menus are set to 'Roboto' and '700'. The instruction is: 'Select heading google font & font weight.'

At the bottom of the page, it says 'Powered by Codestar Framework.' and 'Version 1.0.1'.

You are able to change theme typography from here...

## 4. Styling

The screenshot shows the 'Educare theme options' panel by CrazyCafe. The panel has a dark sidebar on the left with menu items: Header area, Logo and favicon, Typography, Styling (highlighted), Blog Settings, Footer Settings, and Backups. The main content area is white and contains three settings:

- Proloader**: A toggle switch is turned ON. Below it, the text reads: "If you want to enable preloader, select on."
- Enable boxed layout**: A toggle switch is turned OFF. Below it, the text reads: "If you want to enable boxed layout, select on."
- Theme color**: A color selection button labeled "Select Color" is shown. Below it, the text reads: "Choose theme primary color."

At the top right of the panel, there are buttons for "Save", "Restore", and "Reset All Options", along with a "show all options" link. At the bottom left, it says "Powered by Codestar Framework." and at the bottom right, "Version 1.0.1".

Change theme style from here, like Theme color, Theme layout and other styling options.

## 5. Blog Settings

Educare theme options by CrazyCafe
